

NITHIN CHOWDARY

8125611565 — nithinchowdary565@gmail.com — LinkedIn — GitHub

EDUCATION

Keshav Memorial Institute of Technology
Bachelor of Technology in Computer Science

Hyderabad, India
Oct 2022 - Present

TECHNICAL SKILLS

Software Engineering: Software Engineering Concepts, Secure Software Development, QA/QC Testing, Agile Methodologies, Metric Reporting

Languages: Python, JavaScript, Java, C++, Go (Golang), Solidity

Web & Frameworks: MERN Stack (MongoDB, Express, React, Node.js), Docker, Git

AI & ML: CrewAI, LangGraph, RAG, LLMs, TensorFlow

Engineering Practices: Technical Documentation, Information Security, Compliance with Audit Requirements

EXPERIENCE

Vitwit
Software Engineering Intern

Hyderabad, India
Nov 2025 - Present

- Developed high-quality, secure, and scalable software solutions using programming languages and adhering to MasterCard standards and best practices.
- Implemented automated testing and documentation to ensure compliance with audit requirements and quality assurance processes.
- Collaborated with geographically distributed teams to research and evaluate technical alternatives for evolving business needs, utilizing strong communication and relationship skills.

DRDO Labs
Research Intern

Hyderabad, India
Aug 2025 - Oct 2025

- Researched and evaluated alternative technical solutions using Machine Learning for defense applications, demonstrating a basic understanding of software engineering concepts and methodologies.
- Implemented and optimized predictive algorithms, ensuring model accuracy, data confidentiality, and adherence to security policies and practices.

Humming Apps
Web Developer

Remote
Apr 2025 - May 2025

- Developed modular, responsive UI components utilizing the MERN stack, delivering accessible digital solutions and demonstrating proactive management of tasks under tight deadlines.
- Collaborated closely with remote team members to enhance process efficiency, showcasing strong organizational and collaborative skills.

PROJECTS

- **SweatSync (AI Fitness Agent)**

- Architected an autonomous multi-agent system using Python, CrewAI, and LangGraph, serving as a personalized trainer and demonstrating secure software development practices.
- Engineered a scalable and secure backend to handle real-time user data, integrating thorough testing documentation and ensuring compliance with quality assurance processes.

Tech Stack: Python, CrewAI, LangGraph

- **Wealth Wise**

- Developed a financial advisory platform using the MERN stack, integrating RAG and fine-tuning models for investment suggestions, while prioritizing data integrity, secure access, and system stability under pressure.
- Implemented live market data integrations, demonstrating a willingness to learn and take on challenging opportunities.

Tech Stack: MERN stack, RAG

- **Permaded (Decentralized Education Platform)**

- Built a decentralized course marketplace using Solana and Anchor Framework, emphasizing immutable and secure content ownership, and maintaining comprehensive technical documentation.
- Adhered to rigorous auditing standards for Smart Contract deployment, ensuring compliance with security policies and practices.

Tech Stack: Solana, Anchor Framework

RESEARCH & PUBLICATIONS

- **"DevConverge: Talk With Your Code"**

Presented at ICECIS Conference. Authored a paper on real-time code interpretation and developer collaboration architectures.

LEADERSHIP & ACHIEVEMENTS

- President, NSS-KMIT: Led a diverse organizational team to execute 38+ events; self-motivated to develop an automated certificate generation portal to improve process efficiency.
- Finalist at Generative AI Hackathon (CBIT x Microsoft)
- 1st Place in IoT Project Competition at KMIT
